

ExxonMobil Selected as Exclusive Lubricants Supplier for Avelo Airlines

- Avelo will use Mobil Jet™ Oil II, Mobil™ HyJet™ V and Mobilgrease™ 33 across its fleet
- Avelo is the first new mainline U.S. carrier in nearly 15 years
- ExxonMobil's industry legacy was driving factor in Avelo's decision

SPRING, Texas and BURBANK, Calif. – [ExxonMobil](#) and [Avelo Airlines](#), announced today that ExxonMobil will be the sole aviation lubricants supplier for Avelo's growing fleet. Avelo, the first new mainline U.S. carrier to launch in nearly 15 years, selected ExxonMobil based on trust in the company's products and legacy in the aviation industry.

Avelo is currently using [Mobil Jet™ Oil II](#) across its fleet of single-class 189-seat Boeing 737-800 aircraft and is in the process of converting to [Mobil™ HyJet™ V](#) and [Mobilgrease™ 33](#). Poised for rapid growth, Avelo needed a lubricant supplier that could scale with its fleet.

"We chose ExxonMobil as our lubricants partner because their experience and reputation in the aviation industry is unmatched," said Greg Baden, Chief Operating Officer, Avelo. "ExxonMobil shares our commitment to excellence, helping us Inspire Travel through everyday low fares. As a trusted brand, we are confident that ExxonMobil can support our needs today and grow with us tomorrow."

The ExxonMobil suite of aviation lubricants has a long history of strong performance in various aircraft and engines which made Avelo confident in its selection.

- Mobil Jet Oil II is a high-performance, synthetic aircraft-type gas turbine lubricant formulated for reliable performance. With more than five decades of flight experience, it has accrued over 5 billion hours of on-wing performance.
- Mobil HyJet V is a high-performance Type V phosphate ester hydraulic fluid used by major airlines for optimal reliability in high pressure systems. It has logged more than 10 million in-service hours since its introduction.
- Mobilgrease 33 is a high-performance, multipurpose airframe grease providing superior performance and hydrolytic stability, excellent resistance to thermal and oxidative degradation and exceptional wear protection.

"ExxonMobil has been a technology leader since 1903, with aviators and engineers relying on our expertise to push the boundaries of flight. From supporting the Wright Brothers' first flight to now being the exclusive lubricants supplier for Avelo, we remain committed to providing innovative aviation lubricant solutions to address customers' evolving needs," said Ali Bakr, ExxonMobil Global Aviation Lubricants Sales Director. "We're excited to continue to make history with Avelo, supporting them as they work to Inspire Travel."

ExxonMobil has a state-of-the-art Port Allen aviation lubricants plant in Baton Rouge, Louisiana. The 90,000-square foot facility is equipped with advanced production technologies designed to raise the bar in product quality and integrity, including in-line blending, high-speed quart line and flow-through racking systems. The plant received the [Zero Net Waste to Landfill Silver Validation from UL](#), which demonstrates ExxonMobil's commitment to reducing environmental impacts and providing airlines with cleaner lubricant choices through Mobil-branded lubricants, including jet oils, greases and

hydraulic oils. ExxonMobil is the first petroleum products company to secure this validation.
